

What is Weald to Waves?

We are a network of farmers, land managers, gardeners, community groups, schools, councils, researchers, and wildlife charities working together to establish a **100-mile nature recovery corridor** from the High Weald to the Sussex coast.

Our gardens and community greenspaces make up 10% of the Sussex landscape.

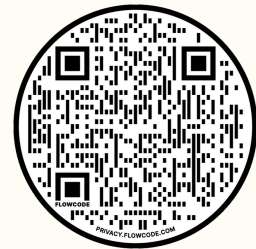

We have **huge collective power** to restore nature. By taking action together, we can create vital stepping stones for wildlife as we reconnect natural habitats, reduce the impacts of climate change and support resilient food production across Sussex.

Join the Corridor and join the dots.

Register your Sussex Gardens and Greenspaces

- Visit the Weald to Waves website and follow a **few simple steps to register**
- **Free to sign up** and we welcome **everyone in Sussex!**
- See **your dot on the Weald to Waves map**

Scan or email to find out more:

Anyone in Sussex can register with Gardens and Greenspaces!

Whether you are a gardener, local community group or a parish council, **if you have a Sussex postcode, we need you!**

Living in a landscape that is increasingly under pressure, **we are a community that looks past the garden fence** to understand the challenges for wildlife as it moves across the county and how we can support it to survive and thrive.

From balconies and window boxes, gardens and allotments, village greens and verges, playgrounds and parks, churchyards and burial grounds, community orchards or woodlands, **whatever the size of your outside space, it can make a difference.**

Every garden and greenspace counts.

Membership benefits

By joining Gardens and Greenspaces you will have access to:

- Our online **members area**
- Free practical **advice and resources** useful for all types of spaces and levels of experience
- Access to **events, talks and networking** opportunities
- Support to monitor wildlife through **citizen science tools and equipment**
- Opportunities to **share your data and experiences** to guide nature recovery action across Sussex
